IP-INTEGRA VoIP APP
iOS USER MANUAL v2.16.6

FREUND

Table of content

Introduction

This user manual will explain how to operate the Integra VoIP application on Apple iOS devices. We will in detail describe the procedures of activating the application and setting it up with the account as well as making and answering a call, giving door access (opening a door), and also explain the call logs.

1. Setting up the application

After the correct information is entered into our SIP Server by your IT Manager, you should receive the Welcome mail to the address you provided. It should contain a .pdf file along with the following information:

Your IP-INTEGRA SIP-client information:

1. Extension number is "**6970**"
2. SIP-client password is "**3368upa6**"
3. SIP-server's LAN IP address is "**192.168.200.130**" on port "**6060**"
4. FQDN of SIP-server is "**fs2.cloud.freund.ba**" on port "**6060**"
5. Access Control PIN "**2649**"

Step 1

Download and Install IP-INTEGRA VoIP APP direct from Google Play or AppStore or scan below QR-Code.

Please, click or scan QR-code in order to go to INTEGRA VoIP App Store site

Step 2

Start INTEGRA VoIP APP on your Smartphone and open QR Scaner then scan Registration code.

Android   iOS

Please, click or scan QR-code in order to make auto provision.

PICTURES SHOWING THE INFORMATION RECEIVED IN THE WELCOME MAIL
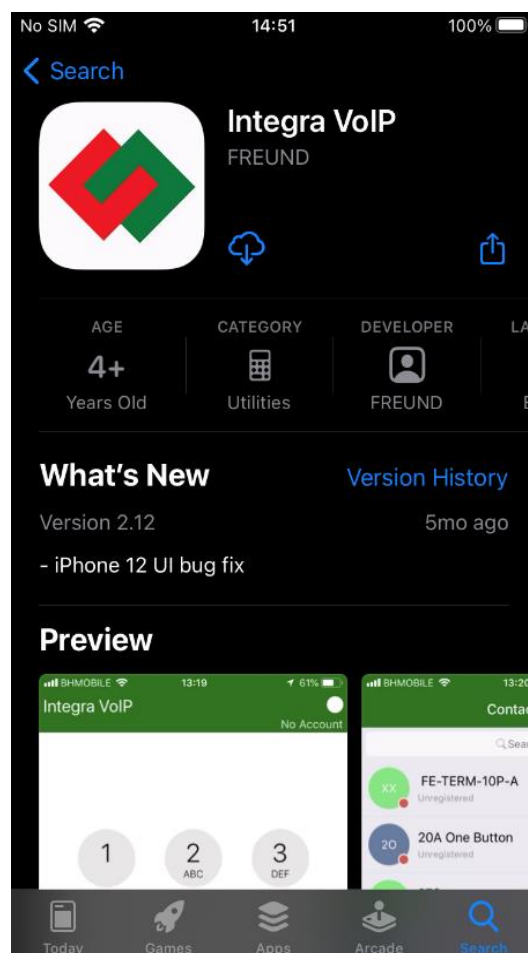

Step 1: Installing the application

Option 1

Open the PDF file provided in the Welcome mail.

Tap on the QR code containing Apple logo. You will be redirected to the App Store page from where you can install the Integra VoIP application.

Option 2

Open the Apple App Store on your mobile device. Search for the 'Integra VoIP' application and install it.

2. Navigation bar

Navigation bar is located at the bottom of the screen.
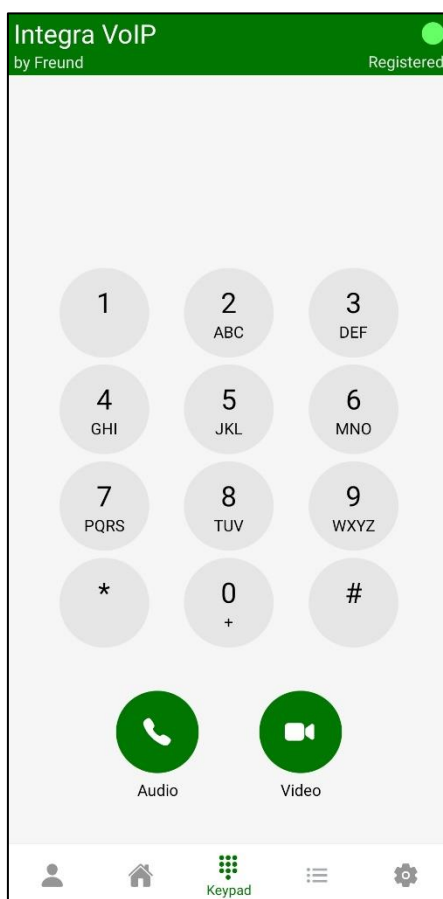

Buttons present are **Contacts, Intercoms, Keypad, Recents** and **Settings**.

NAVIGATION BAR

3. Welcome screen / Keypad

After opening Integra VoIP application, following screen is displayed. User is able to make a call by entering an extension number and pressing either Audio or Video button, respective to which call they want to make.

KEYPAD

If users encounter the screen shown in the picture bellow, it means that the Administrator has **disabled keypad** for this device. However, the calls can still be made and received through either **Contacts** or **Intercoms** tab.

DISABLED KEYPAD

4. Contacts

Tapping on Contacts tab will provide a list of contacts. Search bar is located above the list, and on the right side of Contact names are buttons for making an audio or a video call.

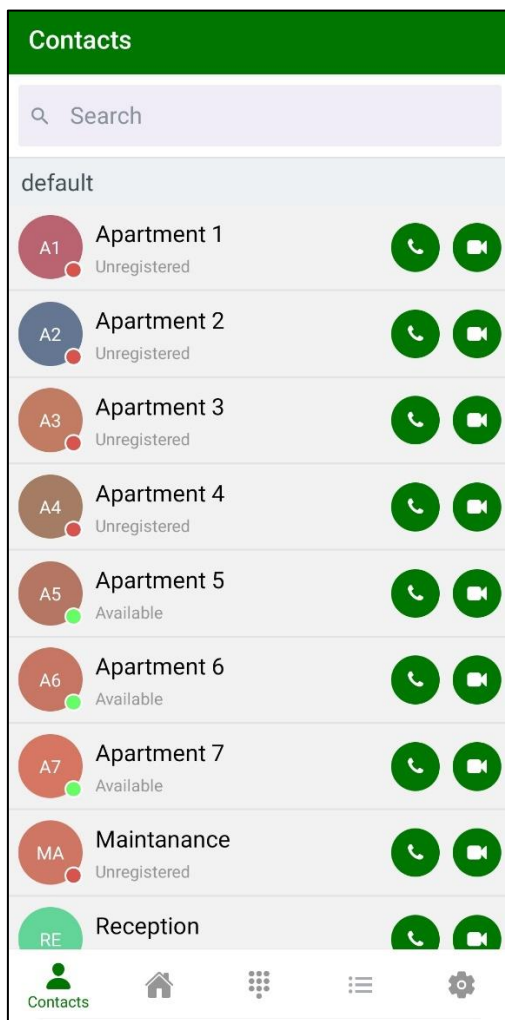

CONTACTS

Registered and available contacts will have a green dot near their icon while the unregistered ones will have red dot.
5. Intercoms

Intercoms tab shows available intercom devices. Tapping on Intercom device in the list will dial that device, while long pressing will trigger a relay and open a door. Opening a door successfully will give a confirmation mesage.

INTERCOMS

FREUND
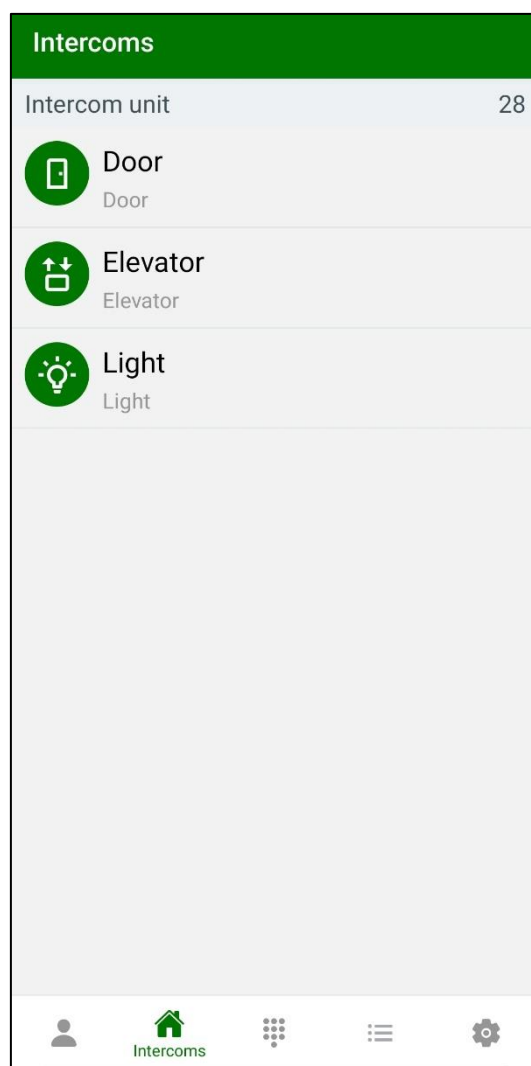

6. Recents

User can access the history of incoming, outgoing or missed calls by clicking on Recents tab.

RECENTS

More **information** is available by clicking on the **Info icon** on the log.

Building administrator is able to send a message/notification to tenants through a SIP server. These messages can be found under **Messages tab** in Recents.

7. Settings

Under Settings, users are able to change the application **language.**

Account settings have been desribed in Section 1 of this document – Setting up the application.

SETTINGS

FREUND
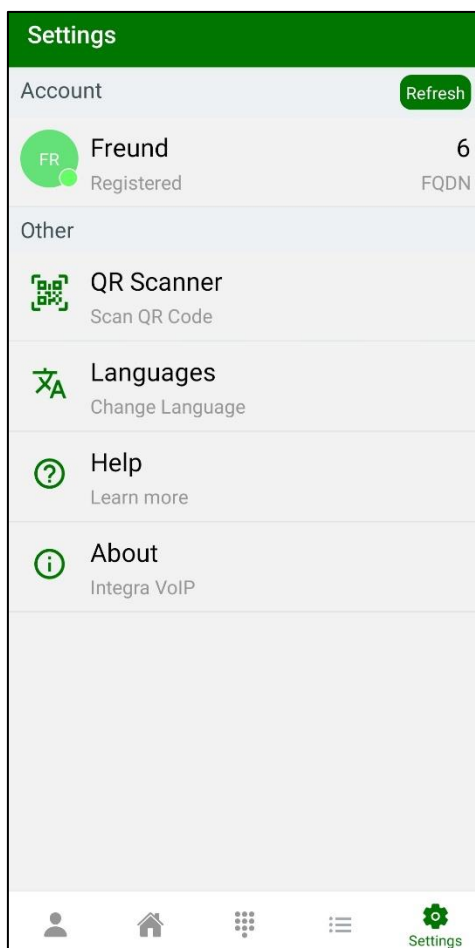

8. Account Status & DND

Account status have two options – **Available** and **DND** or **Do not disturb**. Application by default has Available status. DND feature, when enabled, will ignore all incoming traffic in the application.

To enable it, go to the Keypad screen and tap the circle icon in the top right corner. Green circle indicates that the application has available status, while orange indicates that DND is enabled.
