Ports used by IP-INTEGRA SIP-server:

Protocol	Port (Default)	Short Description	Port Forwarding Required
UDP	15060	IP-INTEGRA VoIP System	**YES**. If you intend to use VoIP providers, remote extensions and mobile applications. **NOTE**: Recommend changing to port 15060 because of ALG conflict with some private routers.
TCP	8090	HTTPS Communication and Remote provisioning	**YES**. If you intend to remote setup and update remote extensions and mobile applications.
UDP	9000-9500	IP-INTEGRA Media Server (RTP)	**YES**. If you intend to use VoIP providers, remote extensions and mobile applications. **NOTE**: Number of ports are double of number of parallel calls. Default setup is 500 ports and 250 parallel calls.
Whitelist following addresses and domains:			
support.freund.ba			**89.239.196.190**
cloud.freund.ba			**51.38.114.236**

NOTE 1: Please make sure that there is access to internet by controlling IP-Address / External IP status on IP-INTEGRA SIP-server dashboard.

NOTE 2: If SIP-ALG on router is active, please turn it OFF.
