

The modern IP Intercom Solution

IP-INTEGRA GIVES YOU NEW OPPORTUNITIES

IP INTEGRA® OFFERS SMART INTERCOM SOLUTIONS

Our IP-INTEGRA® products enable easy monitoring of an entrance area and convenient control of access from the IP-INTEGRA® VoIP APP.

IP-INTERCOM

IP-INTEGRA® INTERCOM SOLUTIONS

With our IP-INTEGRA® IP door phones and video intercoms, you can easily monitor doors and gates in your building. IP-INTEGRA® helps you feel secure at home and in your business.

The IP-INTEGRA® product series is our own brand, based on IP technology. The IP-INTEGRA® series includes advanced system solutions for intercom systems, IP audio systems, and access control systems. Our IP solutions are designed with timeless elegance, focusing on innovative features, an intuitive user interface, and advanced technology.

IP-BASED

A SYSTEM WITH OUR IP-BASED SOLUTIONS GIVES OUR CUSTOMERS ACCESS TO THE LATEST SIP TECHNOLOGY. OUR SOLUTIONS CAN BE EASILY INTEGRATED INTO EXISTING INFRASTRUCTURE. ADDITIONALLY, OUR IP SOLUTIONS PROVIDE THE POSSIBILITY FOR REMOTE ADMINISTRATION OF SYSTEM SOLUTIONS LOCATED ACROSS MULTIPLE GEOGRAPHICAL LOCATIONS.

IP-INTEGRA® products consist of various SYSTEM SOLUTIONS, where different modules can be easily selected from or added.

SAVE ON COSTS FOR KEYS AND DAILY ADMINISTRATION

With the built-in Stand-Alone readers in IP-INTEGRA's intercom solutions, you can save on locksmith expenses when a resident loses their keys.

BETTER USER ADMINISTRATION:

With an IP-INTEGRA® door station, you can use codes or key fobs instead of traditional keys, allowing you to activate/deactivate user accounts as needed. This ensures you always know who has access to the building.

With the built-in reader in IP-INTEGRA's door stations, it's possible to integrate the reader with other access control systems.

All our IP-INTEGRA door stations have a built-in camera, allowing users to easily communicate and visually identify visitors. The IP-INTEGRA system's built-in camera is ONVIF-compatible, meaning it can be connected to various VMS solutions. Additionally, the door station has a built-in light source, ensuring that visitors can always be recognized by the camera.

IP-INTEGRA® SMART INTERCOM

IP-INTEGRA® VoIP app

With the IP-INTEGRA® VoIP APP, you can open the door for the mailman when you're not home!

YOUR INTERCOM IN YOUR POCKET!

IP-INTEGRA® VoIP APP:

With a smart and user-friendly web-based system, IP-INTEGRA® makes it possible to manage intercom systems from a mobile phone or PC without pre-installed systems.

With our FREUND IP-INTEGRA® VOIP app, it's easy to let the mailman in when a package is being delivered.

The IP-INTEGRA® app can only be used on smartphones supported by the iOS App Store and Google Play Store. With the app, you can see who's ringing through your mobile phone and have a conversation even when you're not home. You can accept or reject the visitor's request to enter directly through the app. Administrative tasks become easier – messages can be sent from the administration to residents.

For example, it's possible to inform residents of a building that the housing association will shut off the water supply for a specific period. This eliminates the need for bulletin boards, as residents can be reached directly.

If a user loses their phone, it's easy to deactivate their access through the administration software and quickly create a new user.

The app supports call groups, so an entire family can be associated with the same home. Additionally, there's an option to program time periods during which your personal app will not be available in the call group.

Are you looking for a modern ACC solution?

IP-INTEGRA GIVES YOU NEW OPPORTUNITIES

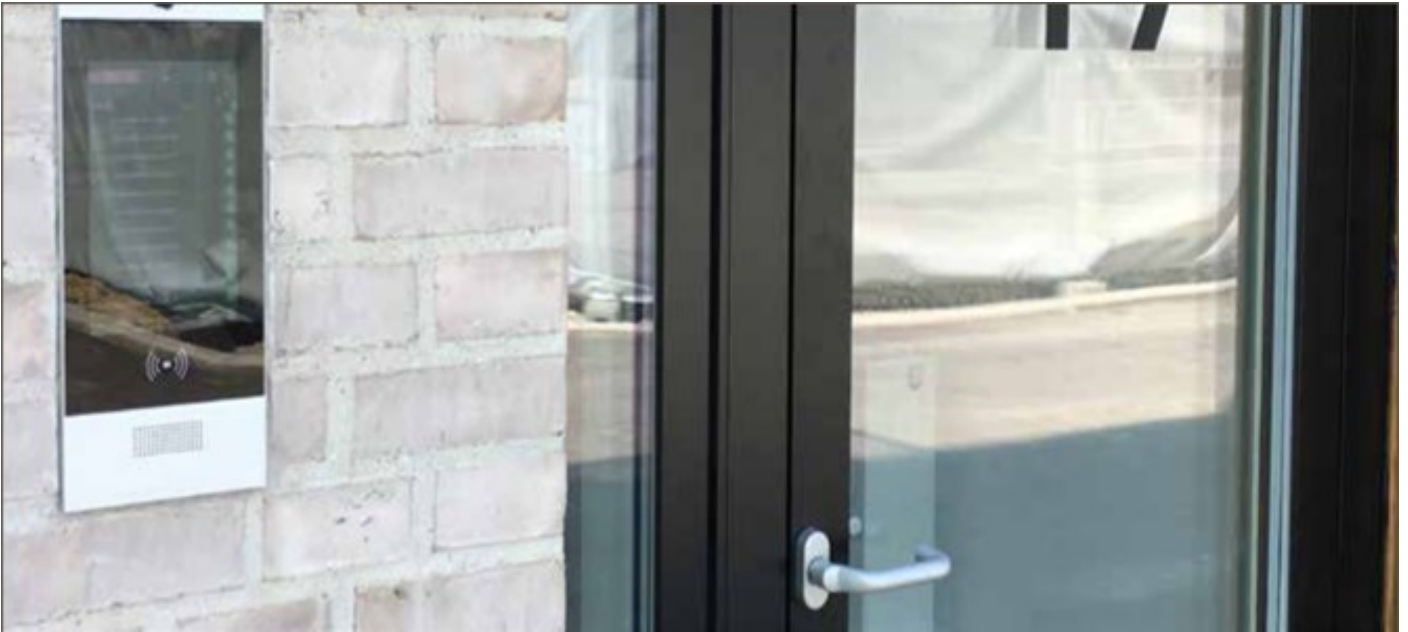

ACCESS CARDS AND CHIPS ARE A SMARTER AND SECURE ALTERNATIVE TO KEYS

With chips in different colors, it will be easy to identify a lost chip and remove access for it. Different colors can also be used for different areas; e.g. apartments, homes, storage, garage, laundry, mailbox, etc.

IP-INTEGRA® ACCESS CONTROL (ACC)

COMPLETE IP INTERCOM AND ACC SOLUTION

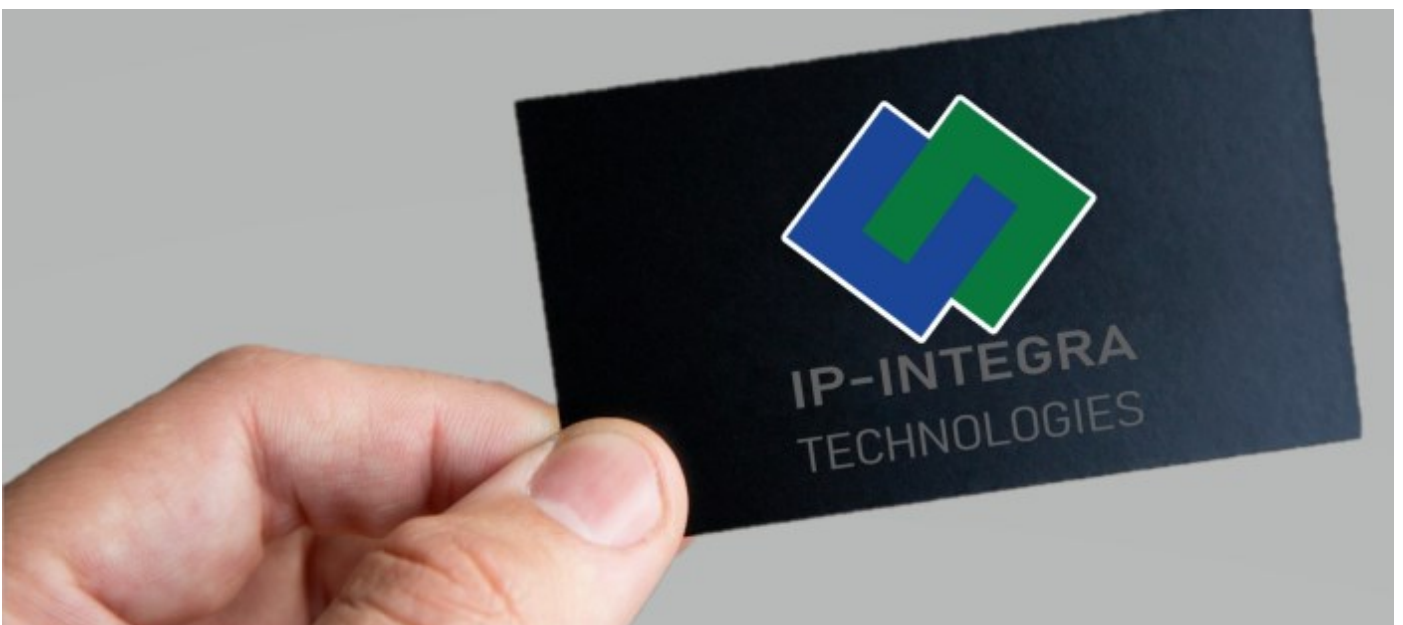

IP-INTEGRA® products provide a complete solution for IP doorphone and access control (ACC).

With IP-INTEGRA, your home becomes safer and everyday life becomes easier not only for you, but also for visitors, delivery services and craftsmen who need access to the building.

The IP-INTEGRA access control system can be controlled and configured according to the user's needs. There are plenty of good reasons to choose a FREUND IP-INTEGRA access control system, e.g.: Web-based access control system that can be configured. Easy access via Network/Internet.

No installation or setup of additional drivers or PC software. Everything is pre-installed in our 2-door and 4-door ACC controllers. Access to the ACC system from a PC, without pre-installed programs. The system can be accessed at different levels, depending on the assigned credentials.

You get an easily scalable system. Since we develop and produce our own ACC solution, we have the opportunity to enter into a dialogue about adapting the system to your wishes and needs. If you are interested in hearing more about our products, contact us at FREUND and we will find the

IP-INTEGRA® READERS

With our IP-INTEGRA Readers you get an access control reader that fits into all environments

IP-INTEGRA offers different types of readers as part of the overall ACC system. The ACC readers are available for installation in door stations, vandal-proof and can be used with a PIN code, key card or tag, as a good alternative to physical keys to allow access.

IP-INTEGRA® readers can also be integrated with our other IP-INTEGRA solutions, which provides simple and clear administration of the entire IP-INTEGRA platform.

By logging in, the administrator can see a log of which codes, key cards or tags are used, where and when. In this way, it is possible to review the history if there is a need to follow up on an incident.

IP-INTEGRA® MAKES IT EASY TO MANAGE ACCESS FOR A USER

It provides extra security to be able to manage access for a user with a specific card, tag, and or a code that belongs to a user who no longer needs access.

Unauthorized access can mean unforeseen events, such as burglary and vandalism. With IP-INTEGRA it is possible to see the history of who has had access to the building, and prevent unauthorized access.

Become Certified IP-INTEGRA Partner

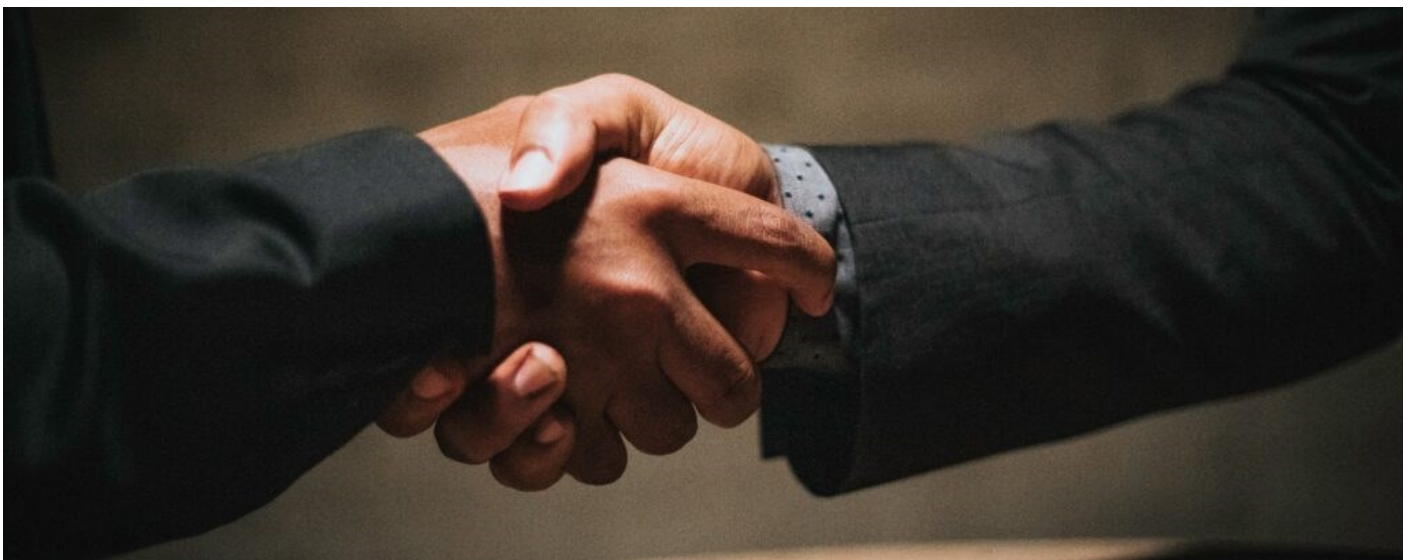

WE SEE YOU AS A PARTNER - WE GROW TOGETHER TOWARDS NEW GOALS!

IP-INTEGRA® is a building system that creates a lot of value for our partners and their customers.

At Freund Elektronika, we want to ensure that all our partners get the most out of our products and systems. It is just as important to us as it is to the installer that our systems are installed, used and serviced in the best way. We believe that we are growing together towards the same goal, namely to have happy and satisfied end users of IP-INTEGRA®.

IP-INTEGRA ENSURES THE STANDARD AND SERVICE LEVEL THAT THE END USER EXPECTS

With continuous training within our IP-INTEGRA systems, it is possible as a partner to always stay up to date with the latest in the industry while also having the opportunity to meet like-minded people with the same issues.
